

Mobile

98 / 100 Speed

! Consider Fixing:

## Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <https://deutschepetitionen.de/deutschepetitionen-de.jpg> (expiration not specified)
- [https://deutschepetitionen.de/deutschepetitionen-de\\_logo.jpg](https://deutschepetitionen.de/deutschepetitionen-de_logo.jpg) (expiration not specified)

## Optimize images

## Mobile

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 1.7KiB (12% reduction).

- Compressing <https://deutschepetitionen.de/deutschepetitionen-de.jpg> could save 1.7KiB (12% reduction).

### 8 Passed Rules

#### Avoid landing page redirects

Your page has no redirects. Learn more about [avoiding landing page redirects](#).

#### Enable compression

You have compression enabled. Learn more about [enabling compression](#).

#### Reduce server response time

Your server responded quickly. Learn more about [server response time optimization](#).

#### Minify CSS

Your CSS is minified. Learn more about [minifying CSS](#).

#### Minify HTML

Your HTML is minified. Learn more about [minifying HTML](#).

#### Minify JavaScript

## Mobile

Your JavaScript content is minified. Learn more about [minifying JavaScript](#).

### Eliminate render-blocking JavaScript and CSS in above-the-fold content

You have no render-blocking resources. Learn more about [removing render-blocking resources](#).

### Prioritize visible content

You have the above-the-fold content properly prioritized. Learn more about [prioritizing visible content](#).

## 72 / 100 User Experience

### Should Fix:

#### Size content to viewport

The page content is too wide for the viewport, forcing the user to scroll horizontally. [Size the page content to the viewport](#) to provide a better user experience.

The page content is 1,108 CSS pixels wide, but the viewport is only 412 CSS pixels wide. The following elements fall outside the viewport:

- The element `` falls outside the viewport.
- The element `<span>Ihre Seite für...etwas angehen!</span>` falls outside the viewport.
- The element `<font>Unsere Seite i...VOLK!!!</font>` falls outside the viewport.
- The element `<a href="https://ip-inf...g/?language=de">ihre e...aten ermitteln</a>` falls outside the viewport.

### Consider Fixing:

# Mobile

## Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<a href="https://deutsc...ue-petitionen/">Petitionen</a>` and 5 others are close to other tap targets.

## 3 Passed Rules

### Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many platforms. Learn more about the importance of [avoiding plugins](#).

### Configure the viewport

Your page specifies a viewport matching the device's size, which allows it to render properly on all devices. Learn more about [configuring viewports](#).

### Use legible font sizes

The text on your page is legible. Learn more about [using legible font sizes](#).
