 Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 4 blocking script resources and 3 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

- <http://travel-asia.srilanka-ferien.net/scripts/jquery.min.js>
- <http://travel-asia.srilanka-ferien.net/scripts/bootstrap.bundle.min.js>
- <http://travel-asia.srilanka-ferien.net/scripts/masonry.pkgd.min.js>
- <http://travel-asia.srilanka-ferien.net/scripts/jquery.nyroModal.custom.min.js>

Mobile

[Optimize CSS Delivery](#) of the following:

- <http://travel-asia.srilanka-ferien.net/themes/default/styles/bootstrap.css>
- <http://travel-asia.srilanka-ferien.net/themes/default/styles/fontawesome-all.min.css>
- <http://travel-asia.srilanka-ferien.net/themes/default/styles/style.css>

Consider Fixing:

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 381B (17% reduction).

- Compressing <http://travel-asia.srilanka-ferien.net/themes/default/styles/images/logo.png> could save 381B (17% reduction).

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 60% of the final above-the-fold content could be rendered with the full HTML response.
